

A holistic view

Rhomberg Bau operates as a full-service provider in the construction and resources sectors. The family-owned business, managed by its owners, is headquartered in Bregenz, Vorarlberg and has locations in Austria, Germany, and Switzerland. It employs 1,000 staff and generates around € 500 million annually.

Rhomberg Bau, now run by the fourth generation of the Rhomberg family, is already leaving its mark on Vorarlberg and the world. From the Bregenz Festival stage to innovative wooden buildings such as the EDGE Suedkreuz Berlin to the Funkhaus Vienna, the YOND in Zurich or the Bäumlequartier directly on Lake Constance, a multitude of projects underline the success of the traditional company founded in 1886.

Rhomberg Bau offers its customers solutions and services for all phases in the life cycle of public and private buildings - from resource extraction and project development to construction, operation, and renovation or rebuilding. The company leverages technological advancements, digitization, the circular economy, renewable resource use, and partnerships.
